

DRIWE App System - Presentation

Transportation Management System

Admin Panel & Access Control

Admin Panel Access Overview

Two Types of Access Control

1. Administrative Access

- Full system control for administrators
- Ability to make all changes and modifications
- View all transactions and financial data
- Complete money management capabilities

2. Read-Only Team Access

- Limited access for team members
 - Cannot make system changes
 - Access granted for knowledge and learning purposes only
 - View-only permissions for operational data
-

OTP Authentication System

Enhanced Security Through Phone Verification

Traditional Password Replacement:

- Eliminates need for password setting
- Customer enters their phone number
- System generates and sends OTP automatically
- Secure verification process
- Instant app access upon successful verification

Benefits:

- Improved security
- Simplified user experience
- Reduced password-related support issues

- - **ICONS CHANGE:**
 - There will be two icons:book cab and courier
 - They will rotate and in 5 seconds drive insaan will pop out in book cab
 - Drive samaan will pop out in place of courier
 - Icons should keep shuffling
-

Implementation Summary

Next Steps

Phase 1: Admin panel development with access controls

Phase 2: OTP authentication system integration

Phase 3: Service category framework implementation

Phase 4: Dynamic icon management system

Phase 5: Testing and deployment
